Experience

Commercial Real Estate Analyst

TownHouse Partners, New York, NY, November 2015 - February 2016

Underwrote and modeled real estate asset-based lending transactions as a consultant to bulge-bracket banks like Bancorp, Credit Suisse, and Citigroup. Additionally, analyzed and sourced real estate market research with software and databases such as CoStar, REIS, and Bloomberg.

Venture Capital Intern

Valia Investments, LLC, Cambridge, MA, September 2015 - December 2015

Analyzed early-stage target ventures across tech including Web-based Microfinance, Industry, and Media-Tech. Additionally, prepared Investment Committee presentations and pitch books containing market analysis, financials, patenting, entrepreneur biographies, and investment recommendation.

Investment Banking Summer Analyst

Saudi Fransi Capital (Crédit Agricole CIB), Riyadh, Saudi Arabia, May 2014 - August 2014

Analyzed company valuations and prepared investment pitch-books that include financial analysis, market research, legal and financial due diligence; as part of the part of the Corporate Finance and Public Markets division.

Projects

Fox Deck

Fox Deck is a web app that helps entrepreneurs quickly generate financial projections to be incorporated in an investor deck or business plan. Fox Deck has MS Excel functionality and uses React-Bootstrap-Tables library to display data. The app is built with React.js and Twitter Bootstrap in the front end, Ruby on Rails in the backend, PostgreSQL database, and uses the Devise Ruby gem to authenticate users.

Mapado NYC

Mapado is a task manager that unlike traditional list and calendar apps, allows you to view your tasks on a map. The app is built with a Node.js/Express backend with full CRUD functionality, MongoDB database, and a React.js front-end. Mapado uses the Mapbox.js library, Google geolocation and geocoding API.

Rated

Rated is a web app that accesses the NYC government API/database to display restaurant rating, hygiene and health violations. The app also uses the Mapbox.js api to map the user and the searched restaurant using geolocation. The app is built using HTML, CSS/Bootstrap, and JavaScript.

Serpent

Serpent is an action game inspired by the NOKIA cell-phone game popular in the 90's. The web app is built using HTML, CSS, and vanilla-JavaScript.

Education

Full-stack (frontend/backend) Programming Immersive

General Assembly New York • New York, NY • 2016
